PROFESSIONAL SUMMARY

Enterprise Java Backend Developer with hands-on experience at DRDO (DESIDOC), contributing to the modernization of business-critical applications and scalable backend systems. Experienced in legacy system modernization, enterprise data integration, and developing secure internal platforms supporting over 10,000 employee records. Strong interest in enterprise software engineering and AI-assisted development practices.

CORE TECHNICAL SKILLS

Languages • Java • SQL • Python • HTML/CSS
Frameworks • Spring Boot • Spring MVC • Spring Data JPA • Thymeleaf • Bootstrap
AI-Assisted Dev • Claude • CodeX • GitHub Copilot • LLM-based Development Tools • Prompt Engineering
Tools & Platforms • Git • GitHub • Maven • Linux • Keycloak
Networking & System Administration: • TCP/IP • HTTP/HTTPS • DNS, Linux Administration • Shell Scripting • SSH
Databases & Cloud Platforms: • DBMS • MySQL • AWS • Firebase and related cloud services

WORK EXPERIENCE (Software Development (Trainee))

July 2025 – Present

Defence Research and Development Organisation (DRDO – DESIDOC), New Delhi

Developed and enhanced core modules of a Pan-DRDO Centralized Workforce Information Platform using Spring Boot, Spring MVC, Thymeleaf, and Bootstrap, supporting thousands of employee records across DRDO's labs and establishments nationwide.

Led legacy data migration and integration, mapping and transferring records from a prior system into the new centralized platform while maintaining data consistency and accuracy.

Administered and tested Keycloak-based authentication and a centralized MoU portal, managing access control and ensuring data accuracy across both systems.

CISCO AICTE VIRTUAL INTERNSHIP (CYBERSECURITY)

(May-July 2024)

RETINODES SOFTWARE SOLUTION PRIVATE LIMITED(JAVA J2SE) (JABALPUR (M.P.).

Year(2022)

KEY PROJECTS

Enterprise Workforce Information & Communication Platform (TDMS) | DRDO

Java 17 | Spring Boot | Spring Data JPA | PostgreSQL | REST APIs | Thymeleaf

- Modernized a legacy workforce information platform supporting 10,000+ employee records.
- Developed scalable backend modules and RESTful APIs.
- Integrated legacy organizational data into the new platform, ensuring seamless migration and business continuity.
- Improved application performance, maintainability, and scalability.

FACE RECOGNITION ATTENDANCE MANAGEMENT SYSTEM | Python, AI-ML

Project Overview : Developed a real-time face attendance system utilizing **Python**, **Opencv** and **Firebase** to automate and streamline attendance management in various settings. This project offers a secure and efficient alternative to traditional manual methods, particularly suitable for large organizations like schools, colleges, and industries. **Multiple functionalities :** - Mark attendance: Automatically marks attendance upon recognizing a registered student. - Data management: Upload, view, update, & manage attendance data from the database. - Graphical interface: Provides visual feedback on system status, including active mode, attendance marked status, and "already marked" notification for repeat attempts.

EDUCATION

(B.Tech.) Computer Science and Engineering

Institute :- Shri Ram Group of Institutions, Jabalpur (2023 - 2026)

CGPA: 7.50

(Diploma) Computer Science and Engineering

Institute :- Kalaniketan Polytechnic College, Jabalpur (2020 - 2023)

CGPA: 7.42

PROFESSIONAL CERTIFICATIONS

- International Student Workshop 2024 on **Data Science** (on Data Science using Python),
- Cisco Networking Academy
- BRAINOVISION SOLUTIONS INDIA PVT. LTD.
- Certificate of Excellence (**Data Structures in JAVA**) CODING NINJAS
- **Python** 3.4.3 Training (Spoken Tutorial Project, IIT Bombay)
- Smart India Hackathon (**SIH**), EY **Techathon** 4.0
- Intro to **ChatGPT** and **Generative AI, AI TOOLS**(365 Data Science)
